Submit Notes

The config file option 'submit' was used.
taskset was used to bind processes to cores except
for 462.libquantum peak

Operating System Notes

'ulimit -s unlimited' was used to set the stacksize to unlimited prior to run
OMP_NUM_THREADS set to number of cores
KMP_AFFINITY set to "physical,0"
KMP_STACKSIZE set to 64M

Platform Notes

This Express5800/320Fd-LR is a fault-tolerant server.
Two modules are installed in this server.
Each module physically has "1CPU chips,12GB memory", The total physical configuration
is "2CPU chips,24GB memory".
Using fault-tolerant lockstep technology, these two modules communicate with each other
and execute the same instructions at the same time, The operating system only sees
"1CPU chips,12GB memory" as the other components add only redundancy and do not
contribute to any performance benefit.
